

ANNUAL REPORT

INTRODUCTION

As Doctors Worldwide Turkey, after a hectic but fruitful year, we continue confidently our journey for health and goodness, with the support of our volunteers and donors.

Committed to working according to standards of international humanitarian agencies, our staff is becoming more professional every passing year. As a result, we continue our services in areas such as emergency, preventive health, therapeutic health, health education, psychosocial support and capacity development this year.

Moreover, we are carrying out projects in collaboration with various charities both in Turkey and abroad, and we feel that we are getting closer every day to our vision of becoming a leading and prominent NGO in its area.

Humanitarian aid activities in Turkey have increased promptly following the responsibility our country took during Somalian Crisis in 2011. Hosting more than 2 million refugees after the Syrian Crisis, Turkey is ranked first according to the amount of aid compared to income, referred as generosity index and ranked second in the total humanitarian aid. The role that our country plays in the field of humanitarian aid and its valuable mission has bestowed significant responsibilities to all non-governmental organizations working in this field. Besides, Doctors Worldwide Turkey in this crucial context has chosen "Sustainability" as its strategic priority. Because, all our activities since 2000 showed us how critical it was to be sustainable and permanent in aid. In this context, we have reviewed all our projects that we completed since our foundation, the partners we cooperated with on these projects, and our system of volunteerism and donation, constituting our main source. Thus, we decided to redesign all these parameters while taking into consideration "sustainability" as our strategic priority.

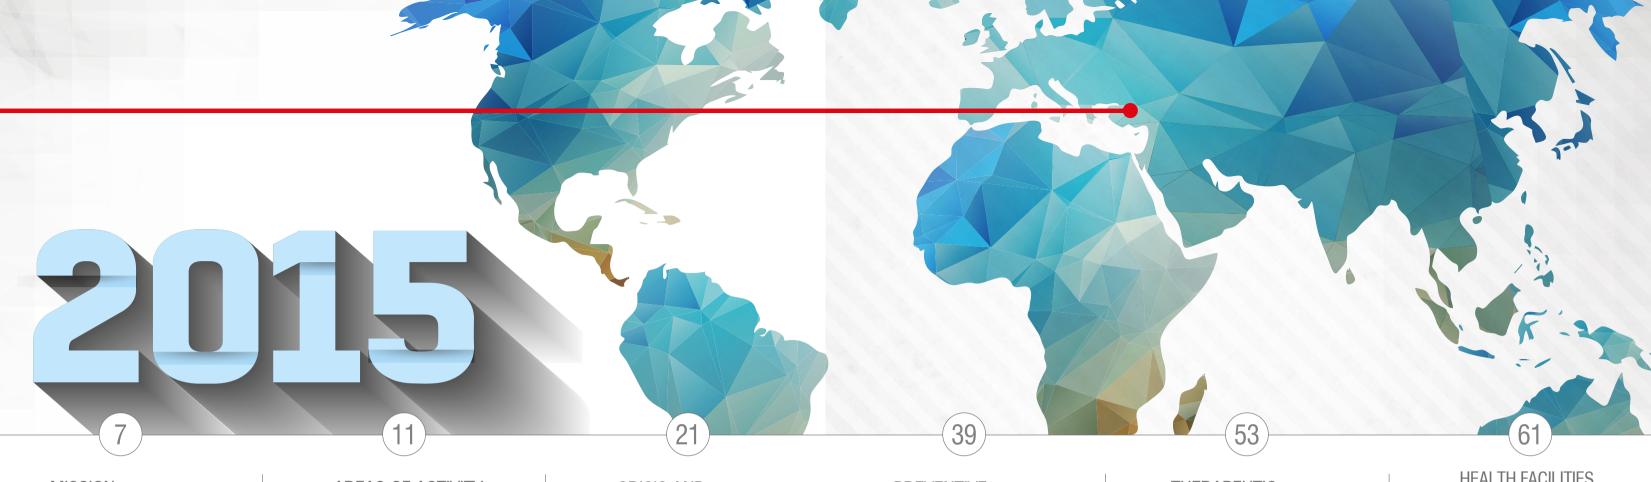

Our other priority was to "revitalize" the humanitarian aid in Turkey and "lead" new projects and processes in this area, by avoiding repeating ourselves and improving our quality every day. In this context, the new projects partners and health projects of refugees, funded by European Union achieved very effective results as exemplary projects in medical humanitarian aid.

Of course, sustainable and leading work require knowledge, experience and corporate know-how. This requirement has motivated us to work more professionally and on a corporate level every day. By increasing our professional employees in 2015, we have strived to develop a more corporate and systematic structure and by benefiting from our donor's valuable experiences. who devoted their time and effort to our institution. With no doubt, corporate structure is not an easy task to achieve in a short time frame through small moves. Consequently, our efforts to improve our organizational structure will continue in the following fields; project management, brand and image management, resource development, human resources management, voluntary relationship management, finance management, information technology management, etc.

As you may review the details in our Annual Report, we believe that we have developed ourselves as well as the places where our activities took place. As ever, we have strived to deliver better results with your support, without compromising our enthusiasm, professionalism and volunteerism comcepts. You have showed your kindness by supporting us. Thus, we have once again been reminded that we are a huge family that spreads out over the continents with the increasing number of our volunteers and donors, our employees and partners. I would like to thank each of our family members personally, wishing that our journey that is based on goodness and health would endure in the following year.

Best regards.

Dr. YAHYAHAN GÜNEY Doctors Worldwide Turkey Chairman

WORLDWIDE 2015

We pave the way for a healthier world.

To Become a Leading and Competent
Medical Aid NGO

VALUES

SANCTITY OF HUMAN

DWWT conforms to human rights standards, defends human dignity and owns the values that exalt humanity.

MORALITY

DWWT adopts ethical approach in their projects; respects moral values that are accepted in all cultures and civilizations. We protect and enhance values such as justice, equality, freedom, dignity, tolerance, privacy, service, aid, security, protection, and sustainability of health.

MODESTY

Volunteers and professional staff of Doctors Worldwide Turkey partake in the projects and execute their work by acknowledging the modest conditions and even the impossibilities in the areas they are serving.

HONESTY AND TRANSPARENCY

DWWT records and reports all details about the projects and aids in automated systems. It works according to the principle of flawless transparency and accountability. In any case, it does not give misleading information to the public opinion.

ALTRUISM

DWWT endures its global service through its volunteers and supporters who cannot rest while others are starving or sick, they also cannot find peace unless they help.

RELIABILITY

DWWT implements all its values and principles in every region it operates in and does not make any compromise under any condition.

INDEPENDENCE

DWWT does not have any direct or indirect affiliation to any state, religious, political, economic or ethnic groups. The beliefs of its volunteers and donors, as well as their political tendency are not considered as the motivating factor for their contribution.

OPENNESS

DWWT values every suggestion, contribution and critical analysis. It shares the goals, objectives, and results of their projects with the world.

PRINCIPLES

VOLUNTEERISM

DWWT operates by adopting volunteerism within its capacity. We care about peoples' suffering, and dream of being a cure not only to particular people but for people across the world, using the experience, time, effort and means we possess to achieve our dreams, away from our personal gains.

NOT HARMING

DWWT evaluates the consequences of the aid basing on the principle of 'Do not harm first!' of medicine; and calculates the individual, social and environmental impact. It is a moral obligation for Doctors Worldwide Turkey not to harm anybody while trying to aid.

AUTONOMY AND BRIEFING

DWWT informs the patients about the details of the medical treatment, the possible consequences and complications that may be encountered by the medical intervention in accordance with the autonomy which is the basic principle of medical ethics and the precondition for good medicine.

LEGITIMATE AND SCIENTIFIC **METHOD APPLICATION**

DWWT executes its projects by applying the proven diagnosis and treatment methods, based on the principles of preventive medicine. In any case, DWWT never uses non-scientific methods in diagnosis and treatment of patients and never uses any chemical, pharmacological or biological substances that have not been through the necessary scientific steps and have not been appropriately licensed yet.

PRIVACY

DWWT does not share the information of the patients in need of medical support with third parties without getting the patient's consent and approval.

RESPECT FOR HUMAN AND DOCTOR'S NEUTRALITY

DWWT respects human health, human life, and personality in their activities. DWWT gives the utmost care and attention when examining and treating the patients, with no discrimination based on gender, race, nationality, religion, sect, ethical angles, personality, social status and political view.

NOT BEING INVOLVED IN **UNAUTHORIZED AREAS**

DWWT, when on duty, does not engage in any attempt that requires special knowledge or skills that it does not possess. except when there are compulsory cases where any delay may threaten a patient's

EMERGENCIES AND WAR

DWWT implements universal rules of medical ethics with impartiality under all circumstances and conditions. DWWT assists people in need of

medical help in extraordinary situations such as war, deportation, and asylum, within the framework of universal legal principles.

EMERGENCY SERVICES

DWWT sets up teams to provide emergency response, aid, and treatment services in all extraordinary situations such as war or crisis, while it also dispatches medical supplies, equipment, and medicines for this purpose.

PREVENTIVE HEALTH SERVICES

DWWT organizes awareness raising and vaccination activities to prevent epidemics of common diseases and to eliminate its threats to people's health. It treats severe nutritional disorders by opening maternity, infant health and nutrition centers for children and pregnant women who do not have access to basic food supplies and therefore affected negatively. DWWT also develops projects on women's health. In addition, it organizes Qurbani and its distribution activities as a nutritional supplement. In order to prevent HIV/AIDS, DWWT also organizes camps for the circumcision of children.

MEDICAL HEALTH SERVICES

DWWT develops projects and programs to cure diseases that cannot be cured with local resources by both surgical and internal medicine practitioners, and coordinates volunteer healthcare teams in this context.

HEALTH UNITS IMPLEMENTATION AND MANAGEMENT PROJECTS

DWWT carries out long-term and permanent projects to improve health systems in regions in need of services by developing projects for the shipment, installation, and management of health units (hospitals, health centers, and laboratories).

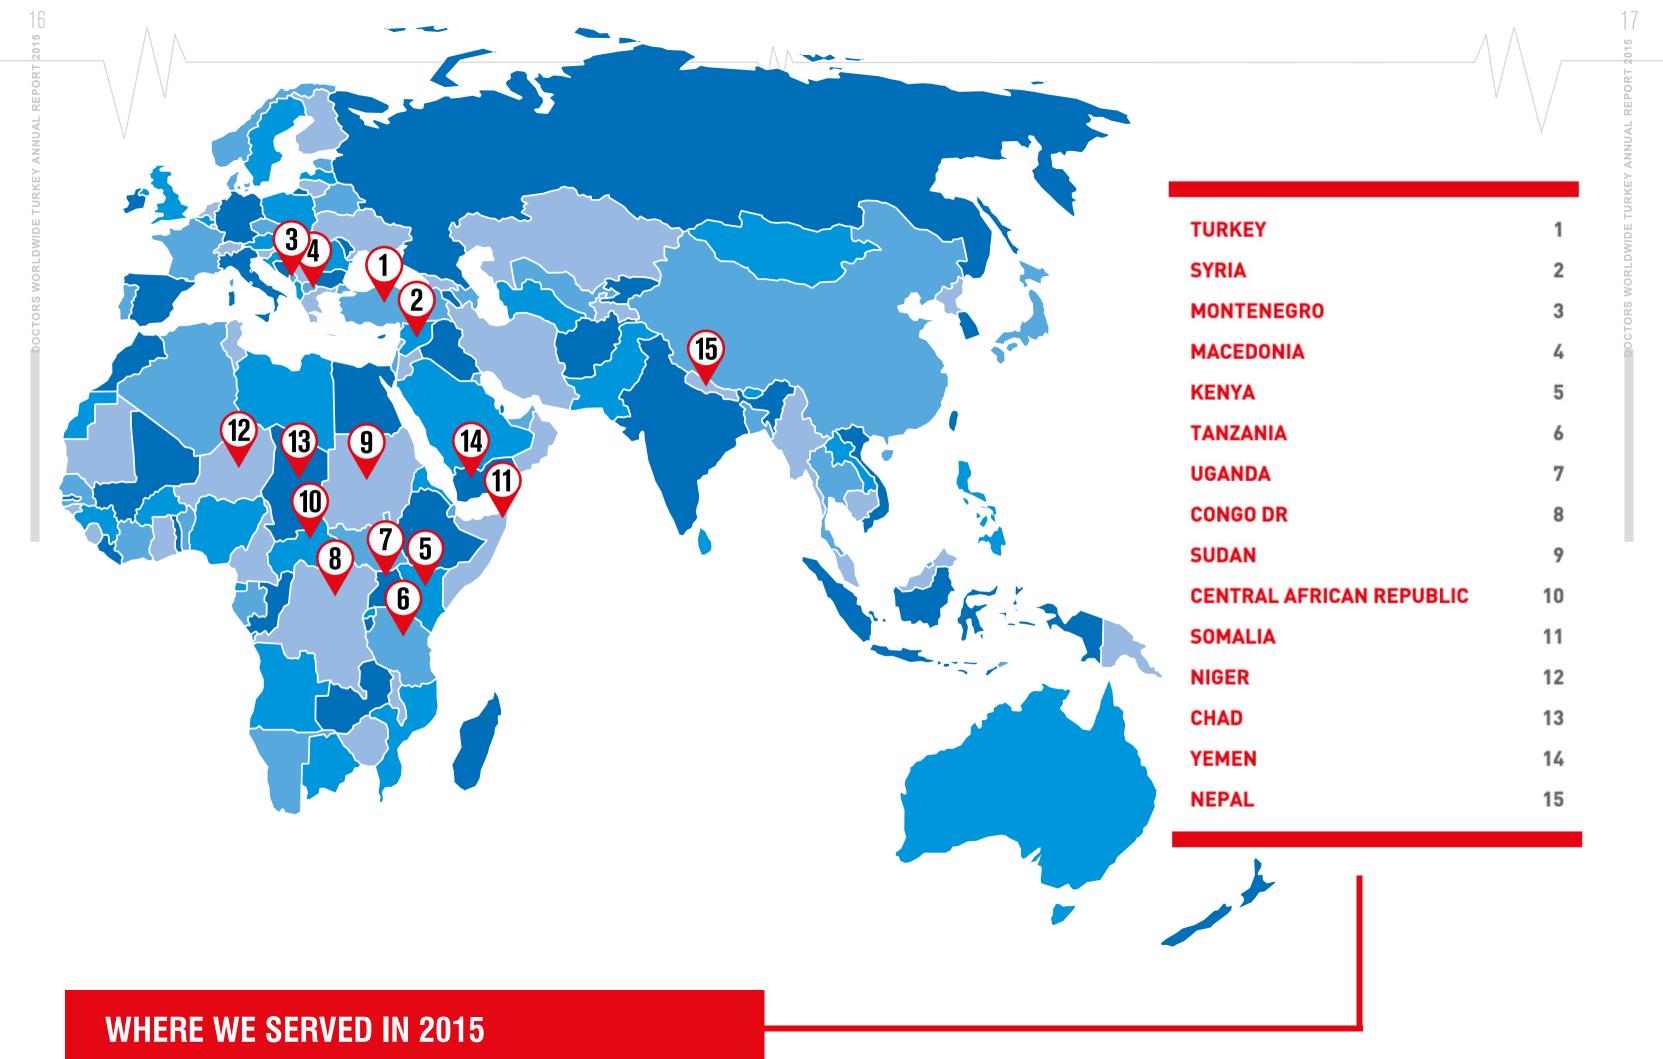

HEALTH EDUCATION PROJECTS

DWWT organizes education, certification and specialization programs at associate degree, undergraduate, and graduate levels in order to increase the capacity of health professionals in countries it serves; it also supports scientific research and activities by coordinating scientific congresses.

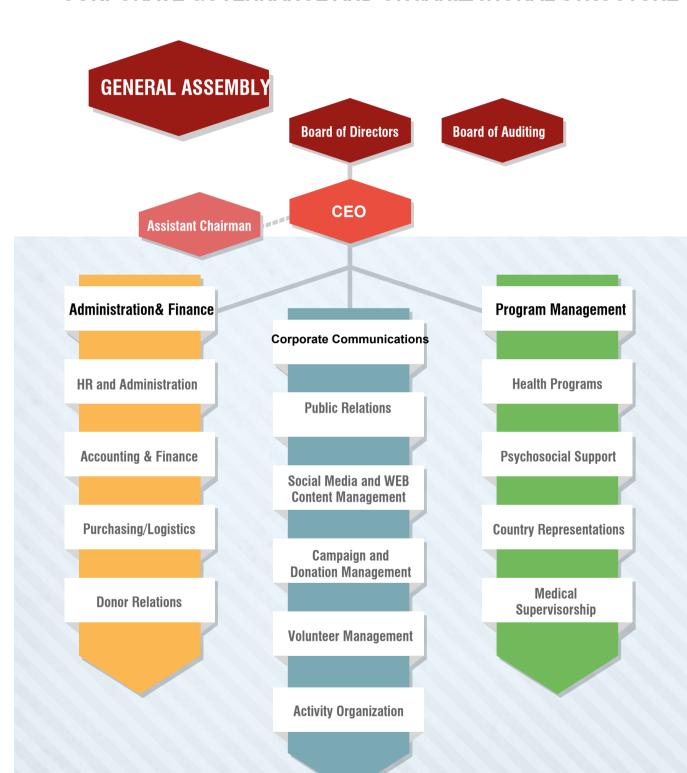

PSYCHOSOCIAL SUPPORT PROJECTS

DWWT conducts informative and supportive activities and focus groups for the people of the region and organises screening and reviews for psychosocial support in trauma, disaster and crisis situations. Develops psychosocial support projects according to the needs, after identifying the current state of local mental health system. Organises trainings and projects for mental health volunteers who would like to take part in these projects. Provides psychosocial assistance to non-governmental organisation employees and volunteer health teams who are working in the field.

CORPORATE GOVERNANCE AND ORGANIZATIONAL STRUCTURE

At the beginning of each year, DWWT administration evaluates the previous year in general and identifies the main strategies, objectives, and projects for the following year.

Strategic decisions are executed by professional staff directed by professionals who are assigned to specific programs and projects according to the board of directors' decision or according to the area of responsibility.

The Board of Directors assembles on regular basis and convenes as soon as possible in exceptional cases; it reviews the strategic decisions by assessing the progression of activities. The plans and programs are updated in line with the evaluations, the activities proceed accordingly.

VOLUNTEERISM AT DWWT

VOLUNTEERISM

Volunteers contribute to the activities of DWWT with devotion. Along with large number of volunteers from various health fields such as doctors, nurses, pharmacists and dentists, there are also many volunteers in the areas other than health. Every passing year, more people voluntarily become part of the goodness and health together with DWWT, and Doctors Worldwide Turkey family grows constantly.

YOUNG DOCTORS WORLDWIDE
Young people who study in different fields, institutes and high school, especially health areas, take part in DWWT's family as "Young Doctors Worldwide". By the end of 2015, there were more than 4.000 Young Doctors Worldwide Turkey volunteers. Eventually, Young Doctors Worldwide, after developing themselves, aims to be a proficient Young Doctor in the journey towards goodness and health.

In the Wadi Khaled district, located 700 m. away from the Lebanese border, a triage center was founded in collaboration with Islamic Medical Association (IMA) Lebanon to transfer the wounded patients to the hospitals located in the inner regions, afterwards, a blood bank and

a laboratory base were founded in Dar El Shifa Hospital and a considerable amount of medication shipment was carried out. Furthermore, voluntary health care teams were also sent to Tripoli.

By installing a pharmaceutical warehouse in Syria, medication and medical equipment shipment with medical materials, composed of first aid and surgical tool kits was carried out. Doctor salaries and operational expenses of the hospital established

in Yamadi region were sponsored and physical conditions and medical equipments of the hospital were improved. With the beginning of the outbreak on the Turkey border of the effects of the crisis, health stations were set up in Yayladagi and Sanliurfa districts of Hatay. Health care service was offered in the camps established for Ezidis in the districts of Sirnak, Batman, and Diyarbakir. Moreover, a clinic existing in Fatih district of Istanbul, by being used at idle times, was brought into service for Syrian asylum seekers.

Equipment support was provided to Yamadı Hospital, which was established in the Turkmen region in order to provide health care services to Syrians that had to migrate to the regions close to Turkey border from Latakia, and its operational expenses were sponsored.

By its location in the region, the hospital, where 3,000 examinations and 70 operations are performed on a monthly average basis, is the place where first intervention was applied to the injured people. Salaries of the doctors working in the hospital were sponsored with the donations provided within the scope of "Syria Needs That Doctor" campaign; while the pharmacy of the hospital was sponsored via medication donations.

YAYLADAGI HEALTH STATION

Hatay Yayladagi Health Station was opened by Doctors Worldwide Turkey in December 2012 and continued offering service to the refugees in Yayladagi also in 2015. The health station offered service 5.5 days in a week with a team of 16 people composed of a gynecologist, a cardiologist, a physiotherapist, a pharmacist, a dentist, a laboratory worker, a pediatrician, two nurses, and two administrative and 5 auxiliary personnel.

At the station, physiotherapy service for the injured Syrians was also delivered. Approximately 10,000 Syrians benefited from the pharmacy where medications were provided for free and from the station where 150 patients on

a daily average received treatment at internal medicine, family practice, and dental polyclinics.

The number of the patients who took health care service from the station exceeded 54,000 as of December 2015.

Doctors Worldwide Turkey, which first of all provided health service support with its volunteer medical teams in the region after the migration happened towards Suruc district of Sanliurfa from Kobani as a result of the attacks intensifying in Kobani (Ayn el- Arab) and its around on 19 September 2014. installed a health station with the purpose of carrying health service to the refugees settled in the temporarily set up camp and in the villages nearby. In total 25,000 examinations were performed till the end of 2015 by 3 doctors and a pharmacist.

SIRNAK, BATMAN, AND DIYARBAKIR HEALTH STATIONS (SOUTHEASTERN ANATOLIA REFUGEE PROJECT)

It was maintained in 2015 under the project launched on November 2014 with a view to offer primary care health service to Ezidis that found asylum in Turkey and settled in Sirnak Maden Camp.

In 2015, the project was extended in a manner that it will comprise the districts of Batman and Diyarbakir as well. 3 new health stations, 2 in Batman and 1 in Diyarbakır Fidanlik Camp, were opened. At the same time, at Batman, Diyarbakir, and Sirnak health stations, support was provided as social and psychological individual and group sessions to Ezidis which live in the camp and many of whom went through physical and psychological trauma. 4,017 people benefited from this service in total.

Service was continued at the health stations, examination number of which are as shown in Table 3. Under the program, free medication worth of 321,156TL was supplied.

ISTANBUL FATIH CLINIC

Doctors Worldwide Turkey, by using support of International Organization for Migration (IOM) and grant of AB ECHO (EU Humanitarian Aid and Civil Protection Department), opened a clinic in order to offer health care service to Syrians at Fatih Clinic of Bezmialem University Hospital. Under this project, in order to provide free medication, examination, and laboratory service for internal medicine, gynecology, pediatrics, family practice, and general surgery, 9 rooms and the laboratory of Fatih Clinic was begun to be used by **Doctors Worldwide Turkey between** 17.30-21.30 on weekdays and between 14.30-18.30 on Saturdays. At the clinic, psychological support service is also given as a primary care health service for Syrian refugees. Information regarding services given in 2015 are shown in Table 4.

SYRIA NEEDS THAT DOCTOR

Because of the crisis in Syria which is in its 5th year, many doctors had to leave the country. As entering into Syria from outside and working is too difficult as well, supporting the doctors who continue to provide health care service by staying in Syria has vital importance on behalf of the weakened health system. Within this context, Doctors Worldwide supports the doctors who continue to give health care service in Syria with the "Syria Needs That Doctor" campaign that it has launched in 2015.

GAZA CRISIS

Doctors Worldwide Turkey, which supported the emergency health aid needs occurred following the attacks directed to Gaza on July 8, 2014, launched a program including projects focused on home care, physiotherapy, and rehabilitation.

Physiotherapy and Rehabilitation Centers Installation and Supporting Projects

It was decided to support existing centers and establish new centers in Gaza by considering the number of people in need of physiotherapy and rehabilitation and the lack of infrastructure regarding this.

Within this framework, equipment support and financial support was provided to two physiotherapy and rehabilitation centers which continue to give service with limited opportunities in North Gaza region and Gaza city.

As of June 2015, a new physiotherapy and rehabilitation center was established and brought into service in Khan Yunis region which is at the south of Gaza.

Islamic University of Gaza Physiotherapy Laboratory Installation

Upon being substantially damaged of Al-Amal Hospital, where the students of Islamic University of Gaza Physiotherapy and Rehabilitation department are performed their practice trainings, during the last attacks; installation of a physiotherapy laboratory was provided with the support of TIKA to the university. With this project, improvement of human capacity of the physiotherapy and home care projects mentioned above were also aimed.

Health Care Service At Home Project

The project via which forming mobile teams that will use the newly established physiotherapy and rehabilitation center as management center and, with these teams, offering health service at their homes to the patients which were injured during the attacks were aimed has been launched as of September 2015.

CENTRAL AFRICA CRISIS

The effects of the crisis appeared in the Central African Republic in 2013 are still present and the needs emerged as a result of the migrations in the country, especially to Chad, Cameroon, Congo, and DR Congo still exist.

Doctors Worldwide Turkey's Bangui PK5 Clinic, which was opened on May 2014 in Bangui, the capital of the Republic of Central Africa, continued offering service to the local community in the first half of 2015.

At the Doba camp, which contains 10,000 refugees, of Chad that contains approximately 100,000 refugees within the scope of the crisis, the clinic service that was brought into use in partnership with Red Cross of Chad in 2014 had continued until the first months of 2015. In consequence of the dispatch of the refugees in Doba camp to Sido camps, again in partnership with Red Cross of Chad, as of 25 September 2015 a new clinic was opened and service offering was continued in Sido refugee camp containing 50,000 refugees which is located at the Maro region of Chad.

NEPAL EARTHQUAKE

Doctors Worldwide Turkey, that took action for emergency health aid at the earthquake with 7.8 magnitude when 7365 people lost their lives and 14,355 people were injured in Nepal on 25 April 2015, sent a volunteer medical team to the region and carried out 896 examinations and 121 operations in

Besides, 20,000 liters of water, 1,000 packages of sanitary pads and 1,000 packages of hand sterilization gel were sent to the region.

Support was given in liaison with Qatar Red Crescent to the rehabilitation of the Singati Community Hospital that was damaged with the earthquake effect and in the Singati region of Nepal.

Doctors Worldwide Turkey has been supporting the clinics named as Hewa Bora, Gambela, Mose, Kamina, Lumata, Lualaba, Ngoy-mani ,and Malemba which are at the rural areas of the Democratic Republic of the Congo, since 2005.

This support has also continued in 2015 and the results received are shown in Table 7.

Within 2015, rehabilitation of Lumata and Lualaba clinics was made and their physical infrastructure was strengthened.

BABY FOOD SUPPORTS

Doctors Worldwide Turkey's
Babies Cannot Endure Hunger'
campaign for the last three
years carried out baby food
purchase and distribution for the
babies of the internal refugees
living in Yamadı region of Syria
and for Yemeni babies that
suffer from chronic malnutrition
due to civil war in 2015

NUTRITION HEALTH CENTERS

Doctors Worldwide, by establishing Maternal and Child Health Centers in Nigeria and Somalia in the previous years, distributed therapeutic food to children suffering from malnutrition.

In 2015, due to the civil war in

Yemen, the number of the children under 5 years who have malnutrition problem has tripled. This number, which had been 160,000 previously, reached to 537,000 in 2015. Highness of these rates pushes Yemeni children to physical and psychological problems.

By opening maternal and child health centers in the Aden city of Yemen for a period of one year, and providing therapeutic food to children suffering from health problems and malnutrition, Doctors Worldwide Turkey, aims to contribute their development.

NUTRITION HEALTH PROJECTS

FOOD AID

Doctors Worldwide Turkey, with the purpose of supporting nutrition health, distributed food in Kenya, Chad, Gambia, DR Congo, Ghana, and Gaza in 2015. Packages containing flour, sugar, oil, rice, beans, milk powder, pasta, and mutton were distributed in Kenya and Ghana; iftar meals were offered in Chad, Gambia, Democratic Republic of Congo, Turkey, Somalia, and Gaza. Food worth of 91,862TL was donated to Syria and Yemen.

NUTRITION HEALTH PROJECTS

Doctors Worldwide Turkey, also in 2015 as it does every year, held qurban organizations in many countries with the purpose of nutrition health support. Priority was attached for carrying out the organization especially in the regions where refugees, whose number has dramatically increased at the present time, are present and in the rural parts and crisis regions of the countries to which volunteer medical teams are sent more. Within this framework, in 2015, gurban organizations were held in Nigeria, Chad, Uganda, Ghana, Somalia, Kenya, Democratic Republic of the Congo, Gambia, Central Africa, Syria, and Bosnia.

TOTAL

13.293

At the same time, Doctors
Worldwide holds cutting ceremonies
for sacrifice for gratitude with regular
intervals within the year. In 2015, in
total of 1.535 sacrifice shares for
gratitude were cut and distributed to
the people in need in various
countries of Africa.

WATER WELL PROJECTS

Access to clean water is one of the most important preventive health services. Waterborne diarrheal diseases cause 4 billion cases resulting with 1.8 million deaths annually. Children under five years constitute 90 percent, in other words, approximately 1.6 million of deaths. (UNICEF)

At many regions of the world, people experience difficulties at reaching clean water even if they have access

to water. Every year thousands of adult and children become sick because of this and there are people who lose their lives due to these sicknesses.

Doctors Worldwide, has drilled water wells in Africa since 2013 as a part of their preventive health service. Within 2015, 13 water wells were drilled in Africa.

THERAPEUTIC HEALTH PROJECTS

VOLUNTEER MEDICAL TEAMS

Doctors Worldwide Turkey organizes volunteer medical teams with a view to support treatment services in the branches requiring expertise in the regions where there is need. Within this scope, fulfillment of operations and examinations that cannot be performed particularly in the relevant regions is aimed.

Nevertheless, teams are organized both as same teams and individually with the intent of field analysis and training. With these purposes, 26 volunteer medical teams were sent to 15 different countries in 2015.

THERAPEUTIC HEALTH PROJECTS

Poor living conditions and saharan conditions cause many eye diseases, cataract in particular, in Africa. In fact, 50% of the blindness reasons manifest itself as a result of cataract cases that may be easily treated. Doctors Worldwide Turkey, with the purpose of curing these eye diseases that paralyzes both patients' and their families' lives, has launched Light of Eyes project and eye camps have been organized in plenty of African countries until today.

At the Light of Eyes camps which were organized in two countries, Somalia and DR Congo, during 2015, in total of 6,708 examinations and 1,006 operations consisting of 5,856 examinations, 656 operations in Somalia and 852 examinations, 41 operations in DR Congo were performed. In addition, 4,000 glasses were distributed to the people who were identified as in need in consequence of the examinations in Somalia.

SMILING CHILDREN

Cleft lip and palate is formed due to non merging on lip or palate or sometimes on both of them with various reasons during face development of a baby at embryonic period. Doctors Worldwide Turkey arranges plastic surgery camps within the Smiling Children project that it launched against this defect

which affects both health and psychological developments of the children negatively.

Within 2015, plastic surgery camp was held in Khartum region of Sudan and 56 operations and 66 examinations in total were carried out in this camp.

THERAPEUTIC HEALTH PROJECTS

AID FOR MEDICINES AND MEDICAL EQUIPMENT

1.7 billion people on earth (comprising 30% of the world population) do not use any medicine along their life. However, it appears that 1/3 of the malaria drugs used in Africa are counterfeit drugs. Saving 10 million people per year would be possible by only enabling access to medicines. (World Health Organization, 2004).

DWWT helps underdeveloped and developing countries with medicines and medical supplies in line with their

needs. Medicines and medical supplies donated by pharmaceutical companies or purchased with cash donations are conveyed together with voluntary health care teams to hospitals, clinics, and maternity, infant and nutrition health centers, which are opened in the regions, to be used prior in emergency situations. Doctors Worldwide Turkey donated medication worth of 3,210,279TL in total within 2015.

SOMALIA DR. OSMAN FIQI HOSPITAL

As of beginning of the Horn of Africa Crisis in July 2011, Doctors Worldwide Turkey started working in Somalia actively. At the first phase, food aid and financial aid were provided to the region and during this period, in consequence of the need analyzes, it was determined that a comprehensive hospital is needed in Mogadishu. Shifa Hospital, which was opened on March 6, 2012, offered totally free health

opportunities to more than 100 thousand people until the end of 2013. Shifa Hospital, on condition of free care of the patients who do not have sufficient money, was transferred to FIQI Foundation, which is a local partner, by means of supporting to its budget and its name was changed as Dr. Osman Fiqi Hospital. With its newborn care unit, ultrasonography devices and two modern operating rooms, the

the hospital is at a position of a comprehensive hospital of Mogadishu. The hospital continued offering service in 2015 as well. Totally performed examination number, emergency case number, inpatient number, operation number, birth number and death number are 18,656, 3,365. 13,865, 684, 630, and 30 respectively.

DEMOCRATIC REPUBLIC OF CONGO HEWA BORA HOSPITAL

Doctors Worldwide Turkey supports a hospital in Hewa Bora region of Lubumbashi city with 2 million population of the Democratic Republic of Congo, where 500 thousand people with low income live. The hospital is with 50 bed capacity and it is one of the biggest hospitals of the region in terms of equipment.

It offers service with gynecology, pediatrics, orthopedics, gastroenterology, eye polyclinic, dental polyclinic, two operating rooms, two intensive care units, x-ray room, pharmacy, full-fledged laboratory, emergency service, and three VIP inpatient wards. In 2014, infrastructure preparations such as supplying medical equipments of the hospital, drilling water well that may provide clean water, ensuring on-site trainings of the current medical teams etc. were fulfilled.

Throughout 2015, Hewa Bora
Hospital's registration procedures were
finished and its official opening was
held by the local authorities. In
addition, by eliminating deficiencies
and calibrating devices, its nonoperative sections were also rendered
active, functionality of hospital
processes was ensured with the sent
volunteer medical teams, technical
trainings were continued to be given
and a hospital management model
was created.

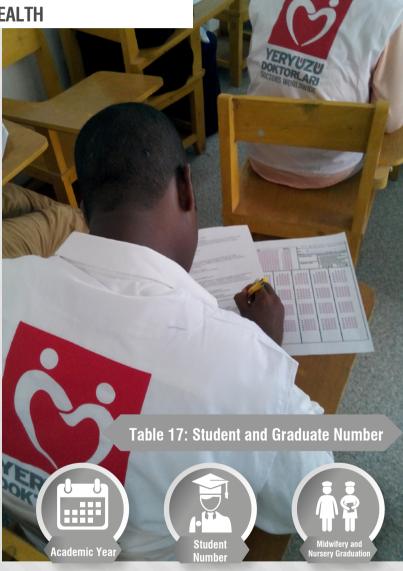

HEALTH EDUCATION PROJECTS

SOMALIA IBN-I SINA VOCATIONAL SCHOOL OF HEALTH

Doctors Worldwide Turkey opened Ibni Sina Vocational School of Health which gives education at the undergraduate level in cooperation with Somalia Benadir University with a view to train technical medical personnel as of October 2013 in the capital of Somalia, Mogadishu. At the school which began providing education with 71 students in 2013-2014 academic year, it is continued in 2015-2016 period to offer education and training with total 185 students from nursery, midwifery, laboratory technician, public health, and pharmaceutics majors.

Until now, in total of 53 students consisting of 31 students in 2013-2014 academic year and 22 students in 2014-2015 academic year graduated from midwifery and nursery majors.

Somalia Specialization on Medicine Program

Until January 2013, no institution offered medicine specialization trainings in Somalia, where the undergraduate education on medicine is also very limited. Consequently, Somalian general practitioners had to develop themselves by either going abroad for education or by monitoring the examinations and surgeries performed by voluntary doctors who visited Somalia. With the aim of contributing to eliminate this deficiency, Doctors Worldwide Turkey initiated Somalia Specialization on Medicine Program with the support of TIKA and in liaison with Somalia Benadir

University and Istanbul Medeniyet University on February 2013.

Education program lasting for 3 years is conducted for 10 months in Somalia and for 2 months in Turkey in a year. 22 doctors in general surgery branch and 7 doctors in internal diseases branch are continuing specialisation education program. In 2015, 12 doctors consisting of 10 general surgery and 2 internal medicine doctors came to Turkey.

HEALTH EDUCATION PROJECTS

In consequence of the field surveys conducted in line with the demands coming from the local stakeholders in Tanzania, it was detected that "Newborn Hearing Screening Program" which is applied at an international level in many countries including Turkey was not existing in Tanzania and it was decided to start up a project in this direction.

As a result of the meetings had

with the authorities of Zanzibar
Outreach Program (ZOP) which is the
local partner in the region, the program
was launched in Mnazi Mmoja
Hospital, the central hospital of
Zanzibar with 1 million inhabitants.

As a result of the trainings carried out by our volunteers, applied trainings of the local crew formed by 19 nurses and 3 audiologists were completed in January and June 2015, in Zanzibar, Tanzania. Within this frame, 1 audiology specialist was brought to Turkey for internship in Istanbul Education and Research Hospital. After the training given to nurses and audiologists, newborn hearing screening system which did not exist throughout the country was set up with the devices which were installed without any problems.

ISLAMIC UNIVERSITY IN UGANDA MEDICAL FACULTY INSTALLATION SUPPORT

Islamic University in Uganda opened Habib Medical School with 55 students in the academic year of 2014-2015. During the establishment of the medical school Doctors Worldwide Turkey granted 240 books to the library and educational posters to the anatomy laboratory of the medical school with the support of TIKA.

Furthermore, with volunteer academicians, support was provided for creating education programs; and free courses in branches of anatomy, biochemistry, physiology and biostatistics were given.

98 students are receiving education in 2015 in Habib Medical School.

School Based Support Program for Refugee Children (MODP) was started to be applied and developed by taking into consideration the psychological support needs of the children in Ilaf School which is one of the schools where Syrian kids receive education in Istanbul.

Under the project, initially, psychological screening was performed to students. The screening results were evaluated by volunteer psychologists. The children in need of psychological support were detected and groups were formed. MODP training containing 8-week sessions created on grounds of Cognitive Behavioral Therapy (CBT) approach

was given as a group study by volunteers of Doctors Worldwide Turkey Psychosocial Support Team to teachers who are at the same school and volunteer for the study. The Training comprises various titles such as spiritual traumas and ways of coping with them, communication skills and it lasted 4 full days. Following the permissions taken from parents, the trained teachers applied MODP module to students aged between 9-14 years, who were selected as a result of the psychological screenings, as groups of 10, in company with weekly supervisions during 8 weeks.

Application of the MODP module by the teachers to the students reduced potential relation problems that may stem from language problems and cultural differences as well as it enabled teachers to gain the skill of applying this module in company with supervision. Furthermore, it was aimed that the Syrian teachers and students would develop mechanisms for coping with the traumas they experienced and that these mechanisms would be permanent in the long term.

PSYCHOSOCIAL SUPPORT PROJECTS

Under the project, which was developed with the intent of improving fraternity emotions between Turkish and Syrian kids and contributing to social swarming, one class from a school where Syrian children receive education and one class from a school where Turkish children receive education were specified and the children in the determined classes were brought together with specific periods in order to carry out various activities.

At these gatherings, various drama games and activities

selected in a manner that language differences will not cause a problem and pictures were drawn within the scope of the workshops. Young Doctors Worldwide volunteers and Doctors Worldwide Turkey Psychosocial Support Team that had undergone the psychoeducation necessary within the project coordinated all of these games and workshops.

At the end of the project, the pictures which are products of the workshops, were exhibited in Taksim Subway Station and were visited by thousands of people.

Moreover, the students who participated in this project were also taken to this exhibition and had the chance to see their own works.

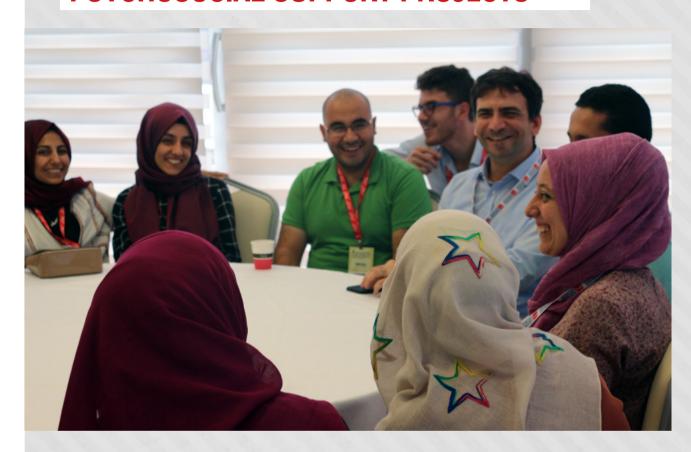

As a result of the project, it was ensured that the children could convey their feelings to their works by gathering around the same art work, express themselves much better and discover their talents. Furthermore, it was contributed to the increasing of unity and solidarity emotions thanks to swarming games and the various works made together by Turkish and Syrian students.

PSYCHOSOCIAL SUPPORT PROJECTS

SHARE GROUP STUDY

For Doctors Worldwide Turkey personnel and volunteers performing field works by going to disaster and crisis regions; share groups via which; they can share their field experiences, learn psychological disorders such as trauma, secondary trauma, depression, post traumatic stress disorder, anxiety disorder and ways of protecting from these disorders and they will get psychoeducation including topics such as psychological endurance, post traumatic growth were organized.

As a result of the study, participants were informed about psychological disorders, symptoms of these and ways of protecting from them, support was given for increase of their psychological endurance and disorders such as secondary trauma were tried to be prevented.

PSYCHOSOCIAL SUPPORT PROJECTS

PSYCHOLOGICAL FIRST AID TRAINING

Fundamental first aid and psychological first aid trainings were given to 60 people consisting of Doctors Worldwide Turkey personnel and volunteers in order to ensure readiness of the teams that may provide fundamental and psychological first aid in a possible emergency case.

It was aimed that the people who receive these trainings will be able to communicate in a stronger and healthier manner with the people affected from a probable disaster situation; and to develop strategies for coping with stress, secondary trauma and other possible psychological disorders, in the light of psychological first aid principles.

PSYCHOLOGICAL SEMINAR AND TRAINING

Seminars and training programs appealing to mental health field workers and students were carried out with the purpose of increasing equipment and number of the people that can deal with trauma cases, acquiring these people with skills for distinguishing spiritual traumas and other psychological problems, and intervening techniques for these disorders.

PHYSICAL RESOURCES

INFORMATION TECHNOLOGIES

In 2015, with a view to create a more powerful information system infrastructure with the growth of the Doctors Worldwide Turkey's data structure; subjects of technology and process renewal and increasing the efficiency of the current system were focused on.

Data and back up areas were expanded; continuity and efficiency of the system were increased by doing (daily and weekly) back up operations for non-disappearance due to any failure of the registered data.

APPLICATIONS

CRM:

A system analysis and improvement study of Microsoft CRM Dynamics product via which applications such as donation management, volunteer management, project management, campaign management, activity management etc. are performed was started for increasing efficiency of the mentioned management areas.

Sharepoint:

Database of sharepoint2010 product via which information sharing, document management and versioning, security, management of the processes with work flow and search and indexing operations are performed was expanded for increasing efficiency of the mentioned areas.

Smart Phone/Tablet Application:

An on-line application, which operates integratedly with the web site, was built. With this application, it is aimed that the users will be able to donate on-line and ask questions to our volunteer doctors. Works regarding this are still continued.

6 JANUARY

SUPPORT OF PROTECTIVE MATERIAL AGAINST EBOLA TO SIERRA LEONE AND LIBERIA

Within the scope of the campaign that we launched in September with the slogan of "If We Cannot Cure Then We Prevent It", we delivered "personal protective equipment" worth of 900 thousand USD to Sierra Leone and Liberia, the two western African countries that have been affected from ebola epidemic the most. Personal protective equipments has vital importance for protection from ebola of the medical staff who works under extremely tough conditions and who has lost more than 350 people since the beginning of the epidemic.

26 JANUARY IBNI SINA VOCATIONAL SCHOOLOF HEALTH GRADUATED ITS FIRST GRADUATES

Inauguration of the new building of Ibni Sina Vocational High School of Health that we have opened in 2013 in Somalia, first graduation ceremony of Nursery major and academic opening of Specialty in Medicine Program were carried out with participation of the President Recep Tayyip Erdogan and his wife Emine Erdogan.

President of Federal Republic of Somalia Hasan Seyh Mahmud, his wife Qamar Ali Omar, Deputy Prime Minister Numan Kurtulmus, his wife Sevgi Kurtulmus, Minister of Health Mehmet Muezzinoglu, his wife Faize Muezzinoglu and Minister of Health of Somalia also attended the programs.

After the speech made on behalf of the Nursery Major graduates, Dr. Maimuna Abdi Gele, one of the participants of the Doctors Worldwide Specialty in Medicine Program, stated in the speech she made that she will be the first female surgeon of Somalia with the education she took with this program and she thanked to Doctors Worldwide Turkey.

New building of the Ibni Sina Vocational School of Health has a closed area of 12 thousand 500 m² and 40 classrooms. Here, Doctors Worldwide will support the sector by opening all the auxiliary health personnel sections that Somalia needed. In the building, certification trainings such as in-service training and continuous medical training of the medical staff outside Mogadishu will be organized as well.

13 SUBAT

SUPPORT TO MEDICAL SCHOOL OF ISLAMIC UNIVERSITY IN UGANDA FROM DOCTORS WORLDWIDE TURKEY

Official inauguration of Habib Medical School that Doctors Worldwide Turkey established in Islamic University in Uganda with the contribution of TIKA was carried out in the capital Kampala. Official opening of the Habib Medical School of Islamic University in Uganda which started education five months ago with our efforts was made with the participation of our chairman Kerem Kinik. With medical education, which was started in partnership with IUIU which is the one and only university established by Muslims in Uganda where 25 universities exist, it is especially aimed to increase the number of Muslim medical staff, doctors, and specialists who are at a very low number in the region.

WE SHARE OUR SALARIES WITH SYRIAN DOCTORS

On March 14, Doctor's Day, through the reunion that we held for the doctors, who offer service under tough conditions at the region in the fourth year of the war in Syria, we called all the doctors for "We Share Our Salaries with Syrian Doctors".

Pediatrician Dr. Hassan Qassum from Atarip Hospital in Idlib region and Dr. Saira El Muradi from Yamadi Hospital joined the reunion via Skype and told the difficult conditions that the Syrian doctors live in. Dr. Kerem Kinik, at his speech he made at the reunion, said that 36 doctors are working now in Aleppo where there were 5 thousand doctors before the war. He expressed that a handful of health personnel is almost writing a humanity saga while the most severe massacres of the recent history leaves thousands of casualties behind.

27 MARCH

1ST TURKEY- PALESTINE SURGICAL CONGRESS HELD IN GAZA

With a view to increase common scientific work opportunities and to develop health education and scientific research capacity in Palestine, for the first time in Gaza, we organized the 1st Turkey-Palestine Surgical Congress in liaison with Ministry of Health of Palestine.

Inauguration of the congress, held on 26-28 March in Gaza and to which 650 doctors from the USA, England, Norway, Italy, France, Germany, West Bank and Gaza cities of Palestine, and Turkey in particular participated and where 116 presentations were performed, was made by the Prime Minister of Palestine Dr. Rami Elhamidlillah and the Minister of Health Dr. Cevad Awad. Ph.D. Orhan Alimoglu from Doctors Worldwide Turkey presided over the congress. In the notice published at the end of the congress, by indicating access to health right is vital as water and electricity, it was stated to the international community that the health projects in Gaza must be sustainable. It was also emphasized that the embargo imposed on Gaza must be removed and doctors' participation to occupational trainings and congresses outside the country must be ensured. Additionally, it was pointed out in Gaza to the importance of rendering mandatory and supporting the specialty and research programs in the surgery field and of promoting the surgeons on the subject of research.

PHYSIOTHERAPY AND REHABILITATION LABORATORY TO GAZA UNIVERSITY BY DOCTORS WORLDWIDE TURKEY

Physiotherapy and rehabilitation laboratories which were set up in Gaza and Khan Yunis cities in cooperation with Doctors Worldwide Turkey and TIKA were brought into service. Inauguration of Physiotherapy and Rehabilitation centers of Khan Yunis University and Islamic University of Gaza that we established in Gaza Strip was performed. It is aimed to offer free health service to 10 thousand patients in 2 years in the centers. The laboratories that entered into service in a short time like 6 months, were equipped with the most advanced technology in this field. One of our laboratories will be in service within the body of Islamic University of Gaza and will offer service to 900 students. Our second laboratory in the city of Khan Yunis will give service to 450 people in a month.

20 APRIL

DOCTORS WORLDWIDE 8TH GENERAL ASSEMBLY: MAY GOODNESS AND HEALTH BE WORLDWIDE

Our new board was elected at its 8th Ordinary General Assembly held with its slogan "May Goodness and Health Be Worldwide". At his speech he addressed at the general assembly, Dr. Kerem Kinik who was re-elected for the Chairmanship said that "This path that we set off for bringing goodness and health together with the deprived corners of the world, may be one of the most meaningful adventures of our lives." At the election when 46 delegates voted, the new board of Doctors Worldwide consisted of these names: Board of Directors; Dr. Kerem Kinik, Exp. Dr. Yahyahan Guney, Prof. Orhan Alimoglu, Asst. Prof. Sule Selman, Prof. Mehmet Akif Kaygusuz, Phar. Muhammed Karabacak, Op. Dr. Oktay Ozkan, Exp. Dr. Havva Sula, Prof. Alper Cihan, Asst. Prof. Ilker Inanc Balkan, Dt. Mustafa Bekerecioglu, Audit Board; Fatih Mehmet Sula, Atty. Osman Baturhan Dursun, Halil Ibrahim Halici, Exp. Dr. Kenan Donmez, Pharm. M. Murat Akbivik.

26 APRIL

OUR VOLUNTEER MEDICAL TEAM AT NEPAL EARTHQUAKE ZONE

Doctors Worldwide Turkey medical rescue team composed of search and rescue expert Murat Yildirim, Orkun Orman, and Doctor Ilhan Ozturk went to Nepal where an earthquake with 7.9 magnitude happened. It is stated that death toll surpassed one thousand and three hundred at the earthquake with 7.9 magnitude occurred at 11:41 according to the local time at the south of the Pokhara region in Nepal. As well as the search and rescue operations, Doctors Worldwide Turkey sent an expert team of three people to the region with 1a.m. flight last night, perform medical need analysis.

17 MAY

WORLD HYPERTENSION DAY

On May 17 World Hypertension Day, Young Doctors Worldwide carried out awareness events in Eminonu Square, Sultanahmet Square, and Uskudar in Istanbul and simultaneously in 20 provinces including Ankara, Izmir, Antalya, Diyarbakir, Tekirdag, Sivas, Konya, and Erzurum. Volunteers who are on field all around Turkey drew attention to diabetes and hypertension which are diseases of our age, with screening and awareness raising programs.

19 MAY

TRAINING OF PSYCHOSOCIAL APPROACHES TO SPIRITUAL TRAUMAS

Training of Psychosocial Approaches to Spiritual Traumas program organized by our Psychosocial Support team commenced with the first module hosted by Hayat Vakfi (Life Foundation) on Sunday, May 17. Within the framework of the 1st module carried out on May 17, Prof. Tamer Aker provided training under the titles of volunteering at trauma field, early intervention to crisis, mourning, and secondary traumatization.

30 MAY

CHILDREN OF WAR TOLD THE WORLD OF THEIR DREAMS

Syrian kids who were disassociated from their countries and living environments were brought together with their Turkish peers with Two Hands One Brush Project which was brought into action in liaison with our Psychosocial Support Team and volunteer university students. Little hands of war reflected to canvases their dreams and hopes with their Turkish friends. In consequence of the project aiming to ensure to prevent Syrian kids, who had to leave their country, from being estranged from the new society and people they have been involved in and to help them cope with their problems in a secure environment, the exhibition composed of pictures of the children was displayed at Taksim Subway area between May 25-30 .

30 MAY

CONTINUE TO BANDAGE SYRIA'S WOUNDS

At the fourth year of the war in Syria, we are continuing to support the community in the region and the doctors offering service under difficult conditions. Our team who went to Syria between May 16-19 performed operations of many Syrian patients and injured, at Yamadi Osama Ablaq Hospital in the rural part of the city of Latakia. Moreover, within the "Syria Needs That Doctor" campaign, salaries of the doctors of the hospital are also sponsored. Later on, our team passed to Hatay and performed operations of the patients staying in El-Emel Hospital in Reyhanlı. Also visits paid to Physiotherapy and Health Centers established to offer service to war weary Syrians to whom medication support was provided in Reyhanlı district of Hatay.

WORLDWIDE

22 JUNE

WE SHARED ABUNDANCE OF RAMADAN IN WORLDWIDE TENT

We brought Babies Cannot Endure Hunger campaign, that we maintain to share Ramadan's abundance with mothers and babies suffering from hunger, together with the public at the Worldwide Tent set up at Eminonu Square this year.

The campaign was introduced to citizens with the reunion held with the participation of our Deputy General Secretary Dr. Ilker Inanc Balkan and our Board of Directors Member Dr. Sümeyve Tumturk. During 1 week in Worldwide Tent, the public obtained information from Young Doctors Worldwide regarding the campaign, learned whether heights and weights of their kids were appropriate to their ages or not, and took healthy nutrition advices from our volunteer doctors.

9 JULY

WORLDWIDE FAMILY GATHERED AT IFTAR

The ones who set their heart on world gathered together at the iftar organized by Young Doctors World in Ramadan. Doctors Worldwide Turkey family, that came together at the iftar table by saying "Babies Cannot Endure Hunger" to bestow hand on to millions of mother and child starving in the world, laid stress on the abundance of sharing in Ramadan month.

29 AUGUST

THIS FESTIVAL WAS CHILDREN'S!

This festival became children's with the works that our Psychosocial Support Team, which developed projects also for the kids negatively affected from the situations such as disaster, crisis and poverty. carried out the last festival. This time, "May This Festival Be Children's" campaign which lasted for nine festivals and led by Pedagogy Foundation put a smile on the orphan children's faces by reaching to Africa with the partnership of Doctors Worldwide Psychosocial Support Team. Doctors Worldwide Psychosocial Support Team and Pedagogy Foundation, that hit the road to make kids of needy families in various parts of world live festival joy and to create good festival stories in their memories, reached to children staying at African orphanages through donators in Ramadan Festival. It also gave toys as gifts in the festival to 1000 children in Kenya and DR Congo.

7 SEPTEMBER TOUGH JOURNEY TO YEMEN

As Doctors Worldwide Turkey, we were in Yemen with our team of four people under the leadership of our Chairman Dr. Kerem Kinik between August 29 – September 2. Our team, that visited the city of Aden located in south of Yemen to start programs for treating the injured, managed to reach their targets with a tough journey.

9 SEPTEMBER

TRAVEL HEALTH AND FIRST AID TRAINING

Like every year, this year hundreds of humanitarian aid workers, volunteers, and press members will go to places in need, in order to deliver aid materials within the scope of the Qurbani organization. As Doctors Worldwide Turkey, with respect to reduce potential risks that the volunteers carrying goodness and health to world may encounter with during the travel period, we held a training comprising subjects of tropical diseases, protection from contagious diseases and general hygiene. practical protective measures, travel health kit preparation, measures to be addressed when faced with risks and first aid.

21 SEPTEMBER

AID FROM ALL OVER THE WORLD HEALED SOMA

As Doctors Worldwide Turkey, the closing reunion of the "Soma Solidarity Project", the coordination of which we carry out with the partnership of Women Sanitarians Education and Solidarity Foundation (KASAV) and IYILIKDER, was held on Saturday, September 19 at the municipality building of Soma. Final report of "Soma Solidarity Project" was declared at the reunion held in Soma.

9 OCTOBER

WORLDWIDE FESTIVAL JOY

As Doctors Worldwide Turkey, this year as well, within the scope of 2015 Qurbani Organization, with the peace of making the sacrifices the proxy of which we got from our donators reach to the people in need, we ended our works of 2015 Qurbani Festival. Throughout the Qurbani Festival, Doctors Worldwide Turkey teams who distributed gurbans of 13,193 shares in total to more than 800,000 people in Chad, Nigeria, DR Congo, Kenya, Ghana, Somalia, Gambia, Uganda, Bosnia, and Syria mutually experienced the healer side of sharing. By virtue of the qurbans sent with 2015 Qurbani Organization, contribution was made for reviving poor economies of world, meeting yearly meat need of the people living under the hunger threshold and taking the deficient vitamins. The sacrifices sent by our donators were remedies for thousands of people. We All Healed by Sharing.

24 OCTOBER

SEMINAR: BEING A WORLDWIDE VOLUNTEER

"Being a Worldwide Volunteer I – Working with Children" seminar program which was organized by Doctors Worldwide Psychosocial Support team was held at the hall of Fatih Sultan Mehmet University Topkapi campus. At the program held on Monday, October 19, training with the theme of "Working with Children" was given by Psychologist Ebrar Yenice Kanik. Prior to the training, presentation titled as "Being A Psychosocial Volunteer" was made by Exp. Psychological Counselor Nagehan Pakdamar Tuzgen from the Psychosocial Support team.

30 OCTOBER

YOUNG DOCTORS WORLWIDE MANAGEMENT CAMP HELD IN BURSA

Management camp of 2015 of Young Doctors Worldwide composed of young medicine students. was held on October 22-25 in Bursa with participation of 130 doctor candidates from 45 universities in 28 districts of Turkey.

4 NOVEMBER

ILAF PROJECT'S FIRST APPLICATION COMPLETED

Psychosocial support programs arranged for Syrian migrant children by our Psychosocial Support Team have been continued incessantly for a year. First step of ILAF project which is one of these programs was fulfilled in Capa ILAF School in Fatih. Children's psychological status and changes in these statuses were observed via tests applied before and after the project. Ilaf Psychosocial Support Project began when the teachers working in Capa ILAF School expressed that statuses such as anger, stress and despair were seen prevalently at children and that they need support from outside. Within the scope of the programs conducted between April 20-May 22, 2015, trainings of 16 hours containing themes of communication with children, group studies, problems related with migration and trauma, children's struggle with tough conditions and facing with fears were given to 9 Syrian teachers who were volunteer at ILAF School. After the project, students, teachers and volunteers were gathered together at a picnic.

4 DECEMBER

WE HIT THE ROAD FOR TURKMENS OF BAYIRBUCAK

As well as the health service we offer at the health stations that we established in the regions where refugees live in Syria and in our country, donations that were collected with aid campaigns and a considerable amount of medication and medical material reached to Bayirbucak region of Syria in the past few days. In the past weeks, Doctors Worldwide Turkey that took action again as the attacks made to Bavirbucak region where Turkmens live increased their speed and violence. delivered medication and medical material of 864,000TL and 783 baby foods of 900 grams worth 20,000TL to Yamadi Hospital in Bayırbucak Region in Syria. Doctors Worldwide supports for more than 1 years the operational expenses of Yamadi Hospital from where 50 thousand people receive service in Bayirbucak region.

15 DECEMBER

DUTY EXCHANGE IN DOCTORS WORLDWIDE

Delegates who gathered due to duty change and with the motto "On the Way to Goodness and Health" elected the new president of Doctors Worldwide, Our Doctors Worldwide President Dr. Kerem Kinik transferred the duty of Doctors Worldwide Turkey Chairmanship to Exp. Dr. Yahyahan Guney.

24 DECEMBER FOR SOMALIAN KIDS: TODAY IS SUGAR PINK

In Soma district of Manisa, "Today is Sugar Pink" project of Young Doctors Worldwide, who took action in order to make the children who lost their relatives at the mine disaster happened on May 13, 2014, feel that they stand by them and to support them, is continuing. At the 2nd stage of "Today is Sugar Pink" project which started last year, Young Doctors Worldwide university communities gathered again in order to deliver the books collected with support of all the Young DWW communities in Turkey to their little sisters and brothers in Soma.

Yervüzü Doktorları 12 milyon dolarlık ilaç bağışladı

Sanlıurfa'nın Suruç ilçesinde he-kim ve eczacılarıyla sağlık hizmeti veren Yeryüzü Doktorları Derneği (YYD), Suruç Yatılı İlköğretim Bölge Okulu'nda aralarında 8 bin Kobanilinin de olduğu 20 binden fazla muayene hizmeti ve ilaç desteğini ücretsiz gerçekleştirdi.

Demeğin çalışmaları hakkında bilgi veren YYD Başkanı Dr. Kerem Kınık, Irak'ın Şengal bölgesindeki kriz sonucu Türkiye'ye iltica eden Ezidiler için Kasım 2014'ten bu yana Şırnak'taki Maden Kampı'nda başlatılan birinci basamak sağlık hizmetleri kapsamının genişletildiğini belirtti, Kınık, Diyarbakır Fidanlık ve Batman Besiri kamplarında da mayıs itibariyle calısmalara baslanıldığını, toplamda 7 bin Ezidi misafire kesintisiz sağlık hizmeti verildiğini kaydetti

Yeryüzü Doktorları'nın psikososyal destek ekibinin de kamplarda görev aldığını ve saha araştırması yaptığını anlatan YYD Baskanı Dr. Kınık, kalıcı psikolog istihdamının öncelikleri arasında olduğunu dile getirdi. Terör ve savaşın getirdi-

ği acıyı azaltmak ve yaraları sarmak için Suriye'deki acil durum bölgelerine 12 milyon dolarlık ilac gönderdiklerini açıklayan Dr. Kerem Kınık, Suriye'deki sahra hastanelerinde ağır kosullarda calisan hekimlere maas, hastanelere de isletme desteğini aralıksız devam ettirdiklerini ifade etti.

İSTANBUL AA

Doctors Worldwide opens two new health centers in Gaza

Lending a helping hand to people living in Gaza and Palestine, Doctors Worldwide has opened two physical treatment and rehabilitation centers with one in Gaza and the other in Khan Yunis, in collaboration with Turkey's Cooperation and Coordination Agency

DOCTORS Worldwide (Yeryüzü Doktorları) recently opened a physical treatment and rehabilitation laboratory in Gaza and a physical treatment and rehabilitation center in Khan Yunis as part of its joint project with Turkey's Cooperation and Coordination Agency (TİKA). Established in only six months at a cost of around \$311,000, the two new centers are equipped with state-ofart rehabilitation technology and will provide free health services due to the continuous violence health services to 10,000 patients within two years. in the region and rehabilitation after the attacks. With support from TIKA, the center in Khan Yunis From 2007 to 2013, 16 volunteer health service began to provide health services this month with groups were active in Palestine and nine of them laboratory equipment provided by the Thai Islamic were based in Gaza. In these camps, 662 operations Medical Association (TIMA). The high-tech center and 2,280 physical examinations were carried out can provide services for up to 450 people. Since 2007 Doctors Worldwide has offered

equipment assistance to the region. In the Gaza surgery, brain surgery, orthopedics and otorhino-Strip the initiative opened the Nasser Surgery frauma Center in collaboration with the Deniz Feneri Association. The center was equipped with tomography, ultrasound, X-ray and mammogram technologies. They also sent \$233,000 worth of emergency medical material support to the Al-Shifa Hospital in Gaza. Four ambulances, teams, including nurses, physicians, physical theraone of which is for intensive care, were also sent to pists and psychologists will treat patients for two the hospital. Two years later, Doctors Worldwide donated various medical consumables, including mobile surgical microscopes, an arthroscopy and Phaco instrument to Al-Shifa. Nasser and the European Gaza Hospitals. A series of trainng sessions were also provided to teach the use of the Islamic University of Gaza.

develop the region's microsurgery capacity. During the Israeli offensive in 2014, the initiative sent medicine worth \$1.4 million as emergency aid to the Gaza Strip.

Aside from health service activities in Gaza, Doctors Worldwide offered advanced diagnosis and treatment training sessions on physiological trauma to mental health experts based in Palestine. Doctors Worldwide has focused on emergency by 108 physicians and 131 volunteer health professionals in the fields of plastic surgery, general

laryngology. Doctors Worldwide continues to provide health services to Palestinians and support them. Health services will soon be provided to those who were injured or disabled as a result of the latest Israeli offensive. Comprising 39 members, five mobile years. Throughout the project, almost 2,000 patients are expected to receive treatment. Doctors Worldwide will also realize some health education projects following the agreements with Al-Shifa Hospital, the Palestinian Ministry of Health and

Charity launches aid campaign for Yemeni children

THE TURKISH branch of Doctors Worldwide, an independent charity that provides medical care in developing countries, said in a statement this week that it is preparing to launch a humanitarian aid campaign in war-torn Yemen.

"Forty-seven percent of Yemeni children below five suffer from chronic malnutrition," Yahyahan Güney, vice president of the Istanbul-based association, said. "140,000 families are in need of help and suffer from low living standards."

Güney said that Doctors Worldwide will set up foodbanks to provide nourishment and medical care to children and their mothers in countries suffering from conflict.

Approximately 5,700 people have been killed in Yemen since the conflict escalated in March, with an estimated 2.3 million people forced to flee their homes and an additional 120,000 leaving the country, according to the UN. ANKARA/AA
